Frontend engineer and product designer with 2+ years shipping production software across fintech, logistics, and education. I build payment flows, operational dashboards, and mobile first products that work on real devices, slow networks, and with non technical users.

PROFESSIONAL EXPERIENCE

iSmart International Ghana

Sept 2025 to Present

Frontend Lead

- Led frontend development for **iSmartPay**, a production fintech platform spanning 15 modules (disbursements, payroll, wallet, collections, settlements, invoicing, utilities, SMS).
- Processed over **800,000 GH¢** in live transaction volume across disbursement and collection flows.
- Built a feature based React 19 architecture with React Query, Zod validation, role based permissions, 2FA, and PDF report generation.
- Maintained **99.9% uptime** on critical money movement flows with Sentry monitoring and a Vitest test suite (70% coverage threshold).
- Productized a white label airtime and data bundle platform for Telecel, NHIS, SSNIT, GPAA and more: **5+ organizations**, including benefits for **12,000+ NHIS employees**.
- Built a configuration-driven theming layer so one codebase re skinned per client without forking; optimized for low end devices and constrained networks.

Fleetly (Fleet Management Platform)

Jan 2025 to July 2025

Lead Frontend Engineer

- Architected a 15+ module fleet operations suite for operators, workshop partners, and parts suppliers behind one SaaS interface.
- Built vehicle lifecycle, maintenance, fuel, safety, financials, live tracking (Leaflet), and an AI fleet copilot (Groq) for natural language queries.
- Designed a resilient Axios service layer against a live REST API with graceful offline degradation for depot and field use.
- Unified a shared design system layer (inputs, modals, tables, badges) reused across every module and partner portal.

Jayee University College

Oct 2023 to Dec 2024

Software Engineer (Contract)

- Built a multi-step admissions portal handling **10,000+ annual applications** with document upload and status tracking.
- Reduced manual processing time by **80%**; achieved <1% invalid submission rate with Zod-driven validation.

S&P Global · S&P Dow Jones Indices

August 2025

Product Management Insight (London, UK)

- Observed the product lifecycle of global financial index products, benchmark positioning, and index methodology.

SELECTED PROJECTS

Akonta: Market Ledger App (React Native, Expo, SQLite, TypeScript)

- Offline first mobile bookkeeping app for Ghanaian market traders with icon based and voice driven sales entry (English/Twi).

- On device SQLite (WAL mode), bilingual i18next UI, NLP product matching, and sale entry in under 5 seconds.

RentPay: Property Rent Tracker (React, Supabase, PostgreSQL)

- Full stack rent management with realtime Supabase sync, row level security, and offline local storage fallback.

HayaPay Marketing Site (Next.js, Framer Motion, Tailwind CSS)

- Statically exported marketing site; increased average session duration by **40%** post-launch.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java

Frontend: React 19, Next.js, TypeScript, Tailwind CSS, Vite, Zustand, React Query, Framer Motion, React Native, Expo

Backend & Data: Node.js, Express, PostgreSQL, Supabase, Prisma, SQLite, REST APIs, Zod

Design: UI/UX Design, Figma, Design Systems, Prototyping, Accessibility first UI

Tools: Git, Docker, nginx, Vitest, Sentry, CI/CD, i18next, jsPDF, Chart.js

EDUCATION

Ashesi University College	Jan 2022 to July 2025
BSc. Computer Science	

University of Cambridge to PACE	Sept 2025 to July 2026
Data Science with Machine Learning & AI (Career Accelerator)	

LEADERSHIP

Member of Parliament, Ashesi University Council	Jan 2024 to Dec 2024
Vetting Committee Member, Judicial Electoral Council	Oct 2024 to Dec 2024
